FROM: Frank J. Filas, Reclamation Engineer 

RE: Site Inspection, E-Z No. 1, DOE/019/037, Grand County, Utah

On September 21, 1987, Terry McParland of the Bureau of Land Management and I inspected the site of International Metal and Mineral's proposed placer on the Dolores River. There has been no mining to date. The company just recently received BLM approval to develop the site after a 120 day delay for review and recommendations by the Division of Wildlife Resources. In the meantime, the company has experienced financial difficulties, and future development is questionable.
